**The Osteopathic Cranial Academy
2018 Annual Conference
“Discovering the Heart of Osteopathy”**

Andrew Taylor Still wanted to know “what attributes of Life are located in the heart”. He referred to the heart as the “Fountain of Life”, from which the Rivers of Life flowed forth to “nourish the famishing fields” and to “import the attributes of life and knowledge”.

We will discover the Heart of Osteopathy by exploring the heart’s many dimensions. We will start with the emergence of the embryologic heart and its fluid physiology; then the establishment of its fascial incarnate form; culminating in the emergence of the oneness of the spiritual potency, which is the Love from which all of Life emerges and to which all must return for Health and Healing.
